MAIND2526 – PROGRAMMING INTERACTIVE OBJECTS

JÉRÉMY MARTIN – NEREA ASENSIO

We live surrounded by communication.
Messages. Notifications. Noise.

But presence is quieter.

Presence is energy.

EXPLORATION

Two users.
Two distant spaces.
One shared surface.

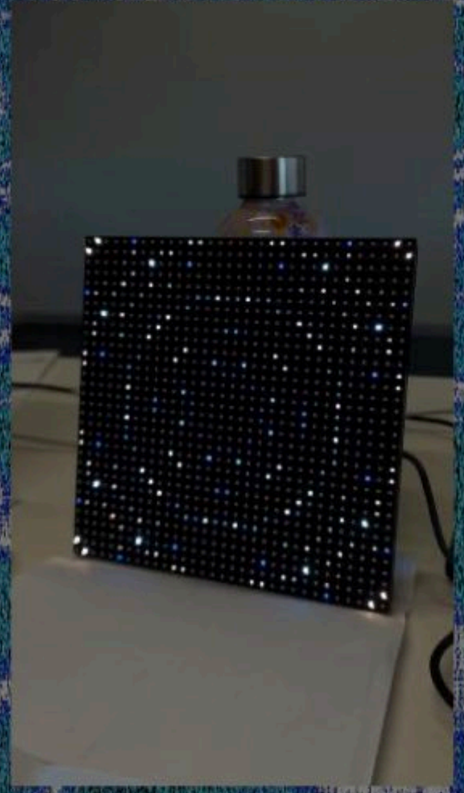

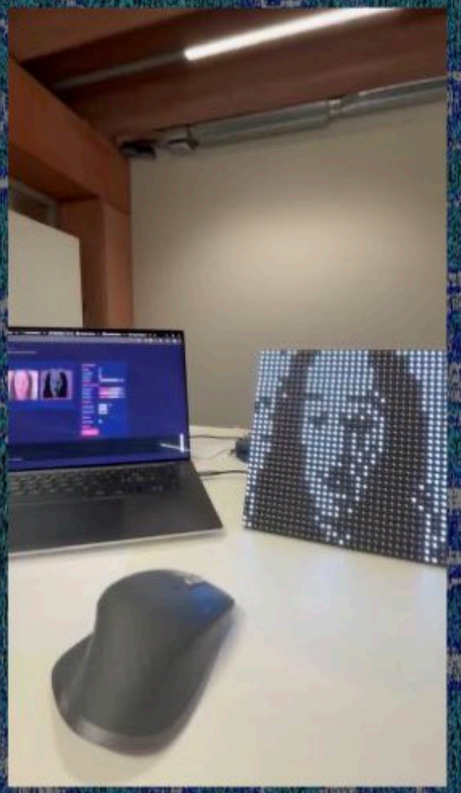

HOW CAN DISTANCE BE MADE VISIBLE?

Process

WE EXPLORED DIFFERENT VISUAL LANGUAGES.
SIGNALS. MARKS. TRACES. SYMBOLS.

WATER FELT JUST RIGHT.
BECAUSE WATER CARRIES DISTURBANCE;
WATER TRAVELS.

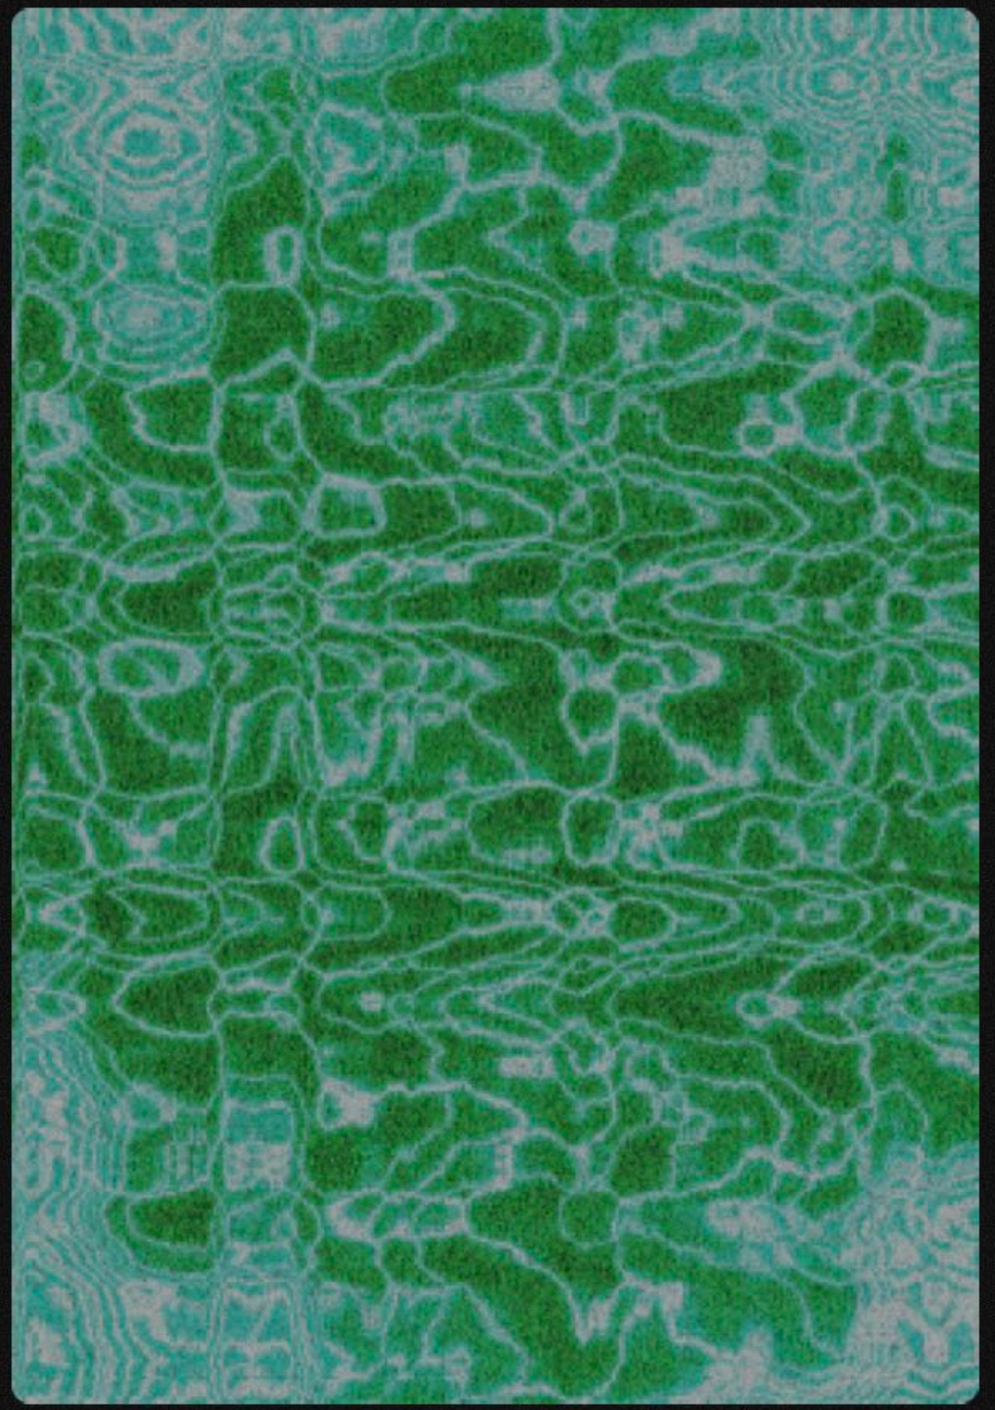

CONCEPT

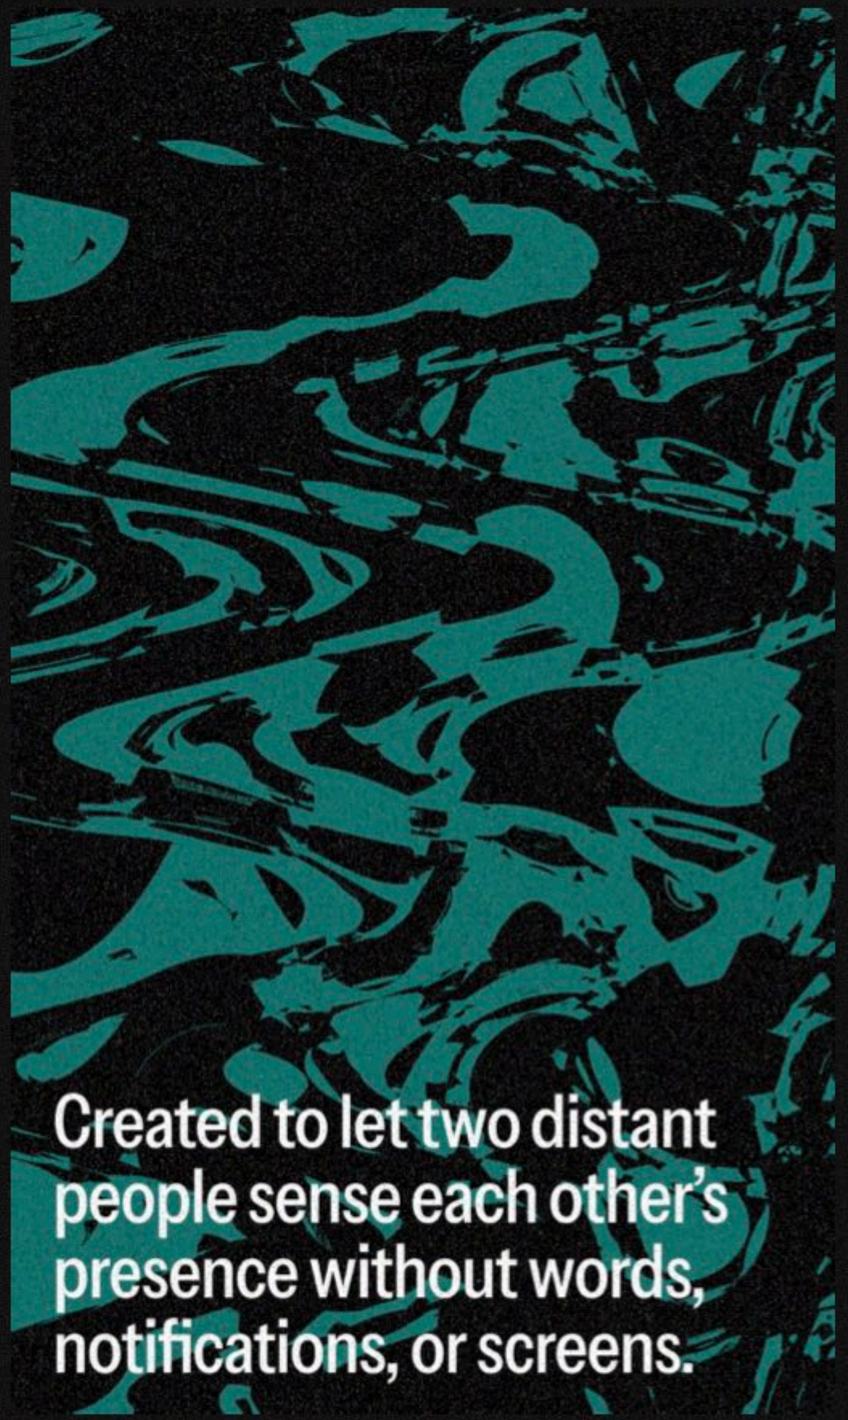

A tapping gesture becomes a drop.

The drop radiates.
The ripple carries energy.
Disturbance as presence.

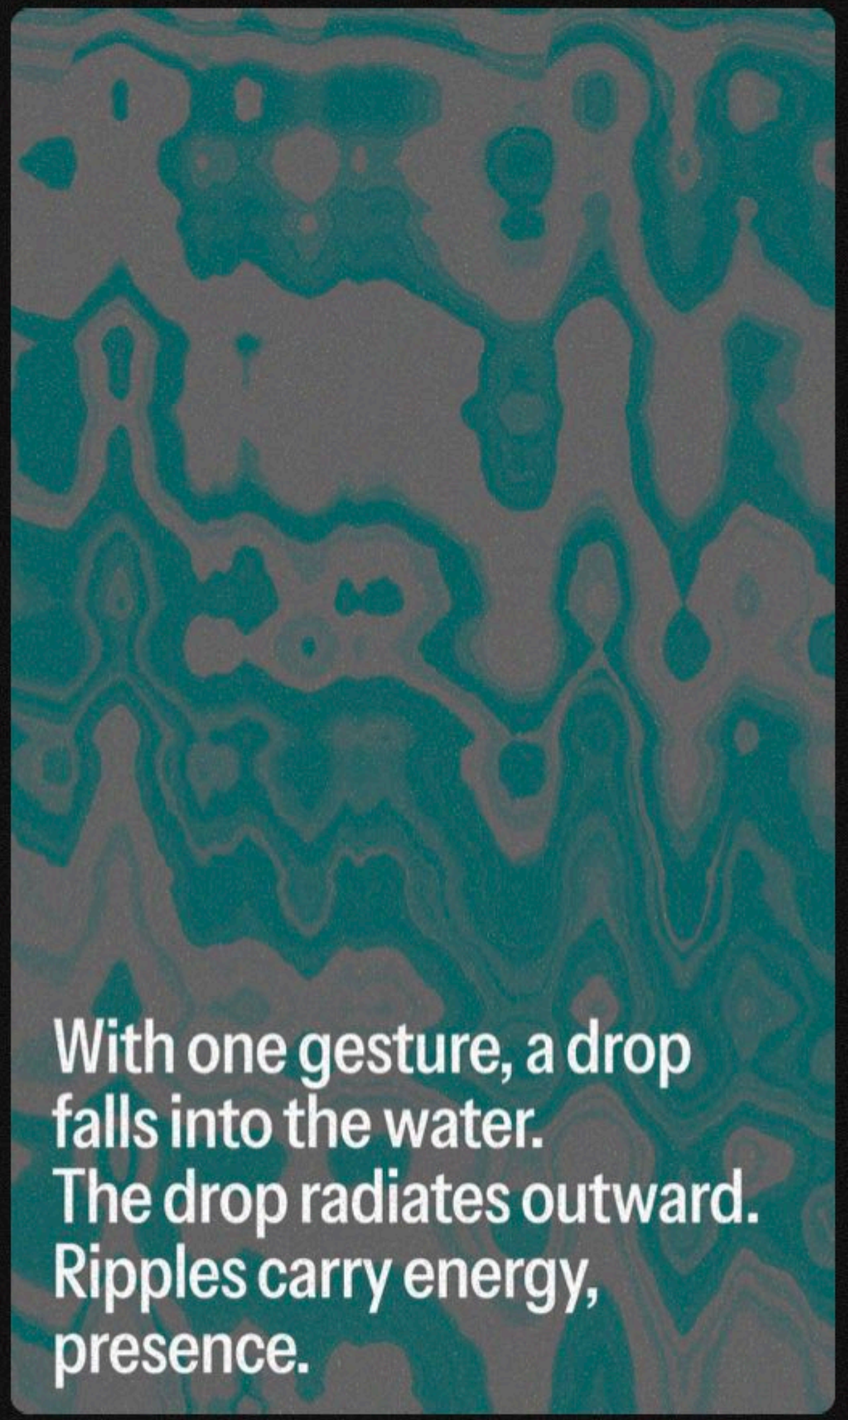

The pond breathes out.
It resets.

Each drop is temporary,
so that the next one can be
meaningful again.

Created to let two distant people sense each other's presence without words, notifications, or screens.

With one gesture, a drop falls into the water.
The drop radiates outward.
Ripples carry energy, presence.

Like in life, a subtle action can travel far and change someone else's state.

THANK YOU!
